Music Hall Sets Pace In Architecture

Two Finish State Department Jobs

Two members of the Bowling Green State University faculty will return to the campus in September after carrying out one-year educational assignments for the Department of State in Europe.

They are Dr. Maurice I. Mandell, associate professor of business administration, and Dr. Louis C. Rus, instructor in English.

Dr. Mandell lectured in economics at the Turku School of Economics in Finland. Dr. Rus conducted research in linguistics at Johannes Gutenberg University in Mainz, Germany.

Both men participated in the International Educational Exchange program under the Fulbright Act. They were chosen for the assignments in the spring of 1956 by the State Department's board of foreign scholarships.

The awards to Dr. Mandell and Dr. Rus were among the 400 grants for lecturing and research abroad included in the program for the academic year 1956-57.

The funds for carrying out the program under the Fulbright Act are certain foreign currencies or credits owed to or owned by the Treasury of the United States. Under executive agreements with foreign governments, exchange programs are in effect in 22 countries.

Dr. Mandell has the degrees of B.S. from New York University, M.B.A. from Syracuse University, and D.B.A. from Indiana University.

Dr. Rus holds the degrees of B.A., M.A., and Ph.D. from the University of Michigan.

They received leaves of absence from Bowling Green State University in order to carry out the State Department assignments.

Alumnus Named To ROTC Faculty Post

Captain James I. Miller, 1950 graduate of Bowling Green State University and member of the university's first Reserve Officers Training Corps graduating class, has joined the Bowling Green faculty as assistant professor of military science and tactics.

He enrolled at BGSU as a veteran of World War II and became a member of Sigma Chi, national social fraternity, and the cross country team. He also was student manager of the swimming team.

After graduation he served with the army in Korea, Germany and at various bases in the United States. Capt. Miller completed the advanced officers training course at Fort Sill, Okla., June 18.

Capt. Miller is a 1943 graduate of West Philadelphia High School, Philadelphia, Pa. He was a finance major at Bowling Green.

Mrs. Miller is the former Elsie Lodge of Amherst, O.

The Millers have two children. They will live at 406 N. Main St., Bowling Green.

NEW HALL OF MUSIC

Structure Used For First Time

The new \$925,000 Hall of Music opened this summer on the BGSU campus, has unique architectural features that may set the pace for other university music buildings in the country.

It is one of the few such buildings to be constructed throughout with acoustical perfection in mind. It is completely air-conditioned and soundproof.

The Music Building and the adjoining women's residence center, Founders Quadrangle, were designed by the architects, Munger, Munger and Associates of Toledo. Acoustical features of the building were planned by the architects in cooperation with Bolt, Beranek and Newman, Inc., of Cambridge, Mass.

All windows are non-operating to control acoustics and to provide proper air and humidity conditions for assured tones of instruments.

Each room is a "cage" that keeps sound from going from one part of the building to another. Rooms are designed so that opposite walls are not parallel and ceilings are not parallel with the floor. All walls and ceilings are slightly askew for the sake of perfect sound. This is achieved with false and slanting walls, baffles and a combination of standard and acoustical materials.

(Continued on page 2)

Admissions Officers Counsel High School Students At Home Schools

More than three thousand high school students in 48 counties of Ohio had personal conferences with Bowling Green State University admissions officials without leaving their home communities between October, 1956, and April, 1957.

The total of 3,065 high school students represented 191 high schools.

Admissions officers traveled thousands of miles to counsel these young people at the request of their high school principals.

The contacts were made for the BGSU admissions office by Philip P. Byers, admissions officer, and James Galloway, placement officer.

Counties covered by this service to Ohio high school students are: Williams, Defiance, Paulding, Van Wert, Mercer, Fulton, Henry, Putnam, Allen, Auglaize, Lucas, Wood, Hancock, Hardin, Ottawa, Sandusky, Seneca, Wyandot, Marion, Crawford, Erie, Huron, Richland, Morrow, Lorain, Ashland, Knox, Cuyahoga, Medina, Wayne, Lake, Geauga, Summit, Portage, Stark, Ashtabula, Trumbull, Mahoning, Shelby, Logan, Union, Miami, Champaign, Montgomery, Greene, Franklin, Butler, and Hamilton.

A similar program of visiting high schools for student conferences is planned for the university term beginning in September. The visitations will begin in October and continue through April.

Any student interested in talking with a Bowling Green admissions representative should check with his or her principal or guidance counselor to see when a uni-

versity official will visit his or her school during the 1957-58 term.

The Bowling Green State University admissions office received a total of 10,314 inquiries from high school students during the period of June 30, 1956, to July 1, 1957. This includes the 3,065

personal inquiries received from students when admissions representatives visited their high school campuses.

Inquiries received through the mail and from high school students visiting the university campus in Bowling Green totaled 7,249 for the same 12-month period.

New Orientation Plan Helps BG Newcomers

The Bowling Green State University campus will be familiar ground to new freshmen and transfer students when they arrive in September.

This familiarity will stem from the new orientation program for new freshmen and transfer students. Each of these young people is having an opportunity to come to the campus in Bowling Green for two days during the summer.

They choose twin dates from a list provided them by the admission's office.

After arriving on the campus, they take tests that help them to determine their best programs of study. They select their courses for the fall semester, talk with their deans and become familiar with campus buildings.

Many new freshmen and transfer students are accompanied by their parents. Parents have an op-

portunity to talk with academic and personnel deans.

The next dates on which these students may come to BGSU for testing and orientation are August 1 and 2, 6 and 7, 8 and 9, 12 and 13, 15 and 16, 27 and 28, and 29 and 30. Only two dates in September may be selected — the fourth and fifth.

Watermelon Party For Student Body Set For August 1

Bowling Green State University summer students will have a watermelon party at Urschel Park on the south campus August 1 at 4 p.m.

Expenses of the party are paid from student activity fees.

60 Students Get Typing Awards

Six members of a Bowling Green State University class in advanced shorthand and transcription have been awarded certificates of proficiency in transcription by the Dictaphone Company.

The awards were made for their performance in a test given by a company representative in connection with class work at the university. Miss Jeanine Peterson, 624 Pittsburg Ave., Erie, Pa., made the highest score, transcribing at the rate of 204 lines an hour. The minimum requirement was 125 lines an hour.

Other BGSU students and the scores that won them the certificate are Miss Mary Ellen Finknebner, 1762 Milburn Ave., Toledo, O., 172 lines; Miss Melva Whitis, 2887 Northland St., Cuyahoga Falls, O., 156 lines; Miss Dorothy Stratton, 116 Thurman Ave., Bluffton, O., 153 lines; Miss Sally Wilson, 3936 Kiowa Road, Youngstown, O., 142 lines, and Miss Christine Skodlar, 20371 Naumann, Euclid, O., 136 lines.

Teacher of the class in which the tests were taken was Dr. Galen Stutsman, chairman of the department of business education.

Structure Used

(Continued from page one)

To obtain isolation of each room, there are air spaces between the walls and thick concrete to stop sound upward and downward.

Independent heating and air conditioning ducts have curves to act as baffles to stifle between-room noises.

Plastered ceilings are suspended from concrete floors above with rubber inshear vibration isolators to minimize transmission of sound from one floor to another. All rotative equipment—fans, air-conditioning pumps, etc.—are mounted on rubber isolators.

Architects of the building believe complete use of acoustical material destroys "live" sound. Perfect sound in the Music Building is preserved by combining flat and curved surfaces, absorptive and reflective materials, while controlling heat and humidity.

Instrumental and choral practice rooms have two sets of double doors at the entrances to serve as "sound traps." These cut down the noise of students entering and leaving.

Professor Merrill C. McEwen, chairman of the department of music, thinks even a 90-piece band couldn't be heard in the University Library next door nor in the adjoining Founders Quadrangle.

Recital Hall Unusual

An unusual feature of the building is its recital hall, designed to be acoustically perfect. The curve of the back wall of this auditorium is for looks on the outside and for acoustics on the inside. This room is considered the ideal in acoustics and musical listening without the aid of mechanical devices. A microphone to be installed near the center of the hall will be for recording and broadcasting purposes, not for the attending audience.

The auditorium has fixed and moveable platform sections to permit a large variety of seating arrangements—including the arena-style stage. It contains about 350 permanent upholstered theater-type seats and upholstered removable chairs.

The recital room can accommodate at one time either a 120-piece orchestra or a 100-member chorus.

Organ Specially Built

The organ in the recital room was specially built to be in concord with the acoustical features of the room. Designer of the instrument is Walter Holtkamp of Cleveland, representing the second generation of a leading family of organ designers. He designed organs for the University of California at Berkeley, Yale University and Massachusetts Institute of Technology.

Capable of producing all classical music from pre-Bach to the present day, the instrument was built by the Shantz Organ Company of Orrville, O.

Four stories high, the new Music Building has an over-all length of 238 feet. The classroom portion of the structure is 50 feet, six inches wide, while the auditorium end is 72 feet, 10 inches wide.

Besides the recital hall, the structure contains choir and instrumental rehearsal halls, 60 practice rooms, 14 studies, 14 classrooms, storage space and offices.

Oglevee In Paris For Research In History

Dr. John F. Oglevee, assistant professor of history, is devoting a major part of the summer to doing research in the National Library in Paris, France.

The research is for his own use. He will spend the rest of the summer touring France after completing this work.

WHISTLE TESTED

The civilian defense disaster warning whistle installed recently on the university power plant has been undergoing tests.

BGSU Grad Heads College Division

Dr. Lowell Ernest Weller, Bowling Green State University graduate and former student assistant in the department of chemistry, has been named associate professor and head of the department of chemistry at Evansville, Ind., College.

For the last nine years, Dr. Weller has been a member of the faculty in the department of agricultural chemistry at Michigan State University.

He holds the degrees of Bachelor of Science from Bowling Green State University and master's and doctor's degrees in biochemistry from Michigan State.

A veteran of the second World War, Dr. Weller is a member of the American Chemical Society, Sigma Xi and the American Association for the advancement of science. A well-known author in his field, he has written for some 20 publications in the field of organic chemistry and biochemistry.

Dr. Weller is a member of the American Chemical Society, Sigma Xi and the American Association for the advancement of science. A well-known author in his field, he has written for some 20 publications in the field of organic chemistry and biochemistry.

American Study Program Started

A program by which a student may receive a bachelor's degree in an area designated as "American Studies" went into effect at Bowling Green State University July 22.

Bowling Green joins more than 100 other universities and colleges of the United States in adopting study programs of this type.

The first course under this program is a seminar on the impact of Darwinism on American thought, taught by Dr. Alma J. Payne, who will head the committee on American studies.

The American studies program may be elected by a BGSU student after his freshman year. It requires a minimum of 42 semester hours in five departments: art, English, history, political science, and philosophy.

Of the 42 semester hours required as a minimum, 15 must be in a major department and must include six hours of basic work in that department. At least three semester hours must be taken in each of the four departments not selected as a major.

At least half of the 42 semester hours must be in courses of the 300-400 level.

The American studies program began in the United States in the middle 1930's.

It resulted from the efforts of educators to discover how higher education might be more effective in leading college graduates to a better understanding of the basic ideals of the democratic state and to a deeper devotion to them.

The program encourages students to know more about their own civilization, its history, its institutions, and its ideals; and to acquire this knowledge through a pattern of courses dealing with American life.

"In establishing an American studies program," said Dr. Payne, "Bowling Green State University has joined a growing movement toward synthesis, not 'specialism'." Faced on one side by totalitarian indoctrination, American colleges have felt the need to give their students a comprehensive view of American institutions and ideals. An American studies program does not aim to isolate and over-emphasize American culture, but rather aims to reveal America's rich heritage from all of Western civilization upon which has been built the liberal democratic tradition.

As chairman of the American studies committee at Bowling Green State University, Dr. Payne is adviser of students who elect the program. She is associate professor of English.

Dr. Payne is an American studies graduate of Western Reserve University, Cleveland.

Other members of the committee are Dr. Virginia B. Platt, professor of history; Dr. Charles A. Barrell, professor and chairman of the department of political science; Dr. Tom H. Tuttle, professor and chairman of the department of philosophy; Dr. Paul D. Running, assistant professor of art.

Chemistry Institute For Teachers Scheduled For Sept. 26 Opening

Bowling Green State University will offer a 30-week institute for high school chemistry teachers, beginning September 26.

The institute will meet for two hours once each week in the BGSU chemistry building.

Anyone who will be teaching chemistry in high school during the 1957-58 term is eligible for selection as one of the 15 institute participants.

Registration and incidental fees of persons selected will be paid by the National Science Foundation. The Foundation will pay transportation costs at the rate of

seven cents a mile. The minimum transportation payment for a participant's attendance of 30 weeks will be \$30 and the maximum payment will be \$200.

Chemistry teachers seeking admission to the institute should write to Dr. W. H. Hall, Department of Chemistry, Bowling Green State University, Bowling Green, Ohio.

Applications for admission should be sent to Dr. Hall before August 20.

Purpose of the course is to improve the subject-matter background of teachers who partici-

pate. It will deal with organic chemistry in the first semester. In the second semester it may include biochemistry, inorganic chemistry, or physical chemistry, depending upon the needs and interests of the group.

Dr. J. E. Weber, professor of chemistry, will head the institute staff which will include an assistant and guest lecturers.

In addition to lectures, the course will include laboratory experience, films and field trips.

Four hours of graduate credit may be earned by institute participants during the 1957-58 term.

Dean Emerson C. Shuck of the college of liberal arts is shown while on an informal inspection tour of the Reserve Officers Training Corps camp at Fort Campbell, Ky., early in July. Dean Shuck was among the officials from colleges and universities in Ohio, Michigan, Kentucky and Tennessee who inspected the training being given ROTC cadets. Forty-nine members of the Bowling Green State University ROTC unit were encamped at Fort Campbell for six weeks.

University Union Has Ohio Symbols

Four main features of the new \$2,750,000 University Union at Bowling Green State University will symbolize the State of Ohio.

The modern four-story building, second largest university union in Ohio, is in the last stages of construction and should be ready for occupancy early in 1958.

Outstanding among the Ohio features is the Ohio Room, a combination meeting room and banquet hall. It is 55 feet long and 38 feet wide. This room has a triangular fireplace with a copper hood, where an open fire will be burning in winter.

The state flower was the inspiration for the Carnation Room, an evening rendezvous for dating couples who seek the best in atmosphere, dancing and refreshment.

About 28 feet wide and 90 feet long, the Carnation Room has three levels, with a dance floor in the center on the lower level. Adjacent to this room is a small snack bar counter for service to guests in the Carnation Room.

A third Ohio feature is the Cardinal Room, where table service will be available for lunch and dinner.

Another area symbolic of the state is the Buckeye lounge, a meeting place.

The University Union has a Grand Ballroom which will accommodate about 3,000 dancers, 2,200 concert listeners or 1,800 banquet guests at one time.

The Grand Ballroom is 164 feet long and 96 feet wide, with a ceiling 22 feet high.

Its spacious hard-wood floor, just completed and waxed, has a finish suggestive of hundreds of mirrors laid side by side.

At the west side of the ballroom is a seven-section plate glass window extension. This section will serve as an orchestra shell or center stage of the ballroom. The balcony on the east side will be equipped with theater-type seating to accommodate 222 persons.

Other features of the modern brick building include two automatic electric passenger elevators; a large university book store; the Falcon's Nest, a snack bar; a television viewing room; a recreation area including eight complete bowling alleys and rooms for billiards and ping-pong; a barber shop; a music and browsing room; a faculty lounge; a 45 by 91-foot dining hall; a completely equipped modern kitchen; a roof garden; a university suite to be used for entertaining official visitors to the campus; 25 guest rooms, and a number of multipurpose rooms.

The building has been financed through the sale of bonds and by student fees and faculty contributions. None of the funds for equipping and furnishing the union came from tax moneys or from instructional funds appropriated by the legislature.

"Will you boys kindly stop passing my leg around?" Sabrina (Jackie Reaver, Springfield) admonishes her three suitors in this scene from "Sabrina Fair," which opened July 30 at the Huron Playhouse. Tenderly nursing Sabrina's scratched knee are John Shibley, Toledo; Loren Shearer, Fremont; and Larry Grisvard, Toledo.

Young American Pianist Artist Series Attraction For August 16

A free public concert by a young American pianist and composer, Daniel Abrams of New York, N.Y., is scheduled for Aug. 16 at 10:30 a.m. in the main auditorium of Bowling Green State University.

Summer classes at the university will follow an altered schedule on that day in order that all summer school students may attend the concert.

The program will be a feature of the BGSU Artist Series. Another feature was the July 17 appearance of the Chanticleers, famed concert male chorus, which was also open to the public.

Mr. Abrams, 26-year-old native of Cleveland, O., recently returned to the United States after three years of study at the Royal Academy of Music in London, England, and extensive concert touring of Europe.

He gave a successful concert at New York's Town Hall in April. While in Europe, Mr. Abrams performed throughout Germany, Sweden, England, Spain, Holland and Switzerland. He was widely acclaimed for his virtuosity and the emotional depth of his performances.

During his three years abroad, the young musician did considerable recording, including twelve Beethoven sonatas. He also realized the publication of the first

of his orchestral compositions, which he will play in the concert at Bowling Green.

His study at the Royal Academy of Music was done under the Fulbright program.

Mr. Abrams will remain in this country until next spring, when he will return to Europe to fulfill extensive concert commitments.

Sixty Courses On Schedule For 2nd Summer Session

Sixty courses in 19 fields are being offered during the second five-week summer session which began July 22.

Fields covered by courses offered July 22 to August 23 include art, biology, business administration, economics, education, English, geography, geology, German, guidance and research, health and physical science, psychology, sociology and speech.

SCHOOL BOARD HANDBOOK

A handbook for Ohio school board members is being prepared by eight graduate students in the College of Education. It is expected to shorten the period of orientation for new board members.

Geology Camp Begins In Nev.

Twenty-six students from eight universities and colleges went to Nevada this week to take part in the first summer geology field camp of Bowling Green State University at Mountain City. It began July 29 and will end Aug. 30.

Participants include 13 students from Bowling Green State University, six from the University of Mississippi, two from Colorado College, and one each from the University of Connecticut, Denison University, Brown University, Oberlin College, and the University of Cincinnati.

The students will receive training in field mapping methods.

Members of the party will camp out and do their own cooking.

Director of the camp is Dr. John R. Coash, associate professor and chairman of the department of geology at Bowling Green State University.

Other staff members will be Dr. Milford S. Loughheed, assistant professor of geology at Bowling Green, and John Howe, Bowling Green alumnus and Ph.D. candidate at the University of Nebraska.

HURON PLAYHOUSE SCHEDULE

The Huron Playhouse schedule for the remainder of the summer follows: "Sabrina Fair," July 30-August 3; "Solid Gold Cadillac," August 6-10; "Missouri Legend," August 13-17; "The Master Cat," children's play, August 15 and 16.

PROF. WILLIAM GOLDNER

Prof. William Goldner is leaving the University to go to Berkeley, California, where he will teach at the University of California. His position is to teach business administration and to do research at the institute of labor relations.

150 IN WORKSHOPS

One hundred fifty-eight persons are participating in five late summer workshops which began at Bowling Green State University July 22.

MANY RECEIVE A's

Seventy-seven students of the university received grades of "A" on all their courses for the second semester of the 1956-57 term.

Opposites Attract? Not Often, Study Indicates

The old adage that "opposites attract each other" may have to take a back seat if a trend indicated by a graduate school study at Bowling Green is borne out by more extensive research.

Findings of this study, based upon a survey of about 200 BGSU male and female students, indicate that the similarities of individuals tend to stimulate friendships between them.

Paul H. Vossick, who made the study for the Master of Arts degree, concluded that "better than seventy per cent of the time, individuals (in the group studied) chose friends who were similar to themselves more frequently than could be attributed to chance."

In questionnaires distributed to the students, Vossick classified friends according to three types:

Friends Defined

1. Pal friend—"the person with whom you are most intimate or the person who is closest to you."

2. Social-recreational friend—"the person with whom you prefer to be for the purpose of social and recreational activity."

3. Intellectually stimulating friend—"the person you would prefer to associate with for the purpose of intellectual stimulation and discussion."

Men Better Pals

Vossick found that men chose men as pals more often than women chose women.

"Similarly," he wrote, "men chose men as intellectually stimulating friends significantly more often than women in this respect." He added that students of both sexes found men more desirable than women as pals and as intellectually stimulating friends.

Men and women were about the same in choosing persons of the opposite sex for the social-recreational type of friend.

Own Age Preferred

Except for the social-recreational friends, the students tended to select friends of their own sex and age who were like themselves with respect to fraternity or sorority membership.

Other findings include:

1. Catholics in the group were more inclined to choose Catholics as friends than Protestants were to choose persons like themselves in religious beliefs, more so than might be expected from chance.

2. Students who were members of religious organizations chose other members of religious organizations more often than might be expected on the basis of chance.

3. White students chose persons of their own race as friends more often than might be expected by chance, whereas Negro students in the study chose Negroes and whites in about the same proportion.

Wealth A Factor

4. The students showed a tendency to select persons more wealthy than themselves rather than those who were less wealthy. The most pronounced bias toward the more wealthy individuals was in the social-recreational friendship group. The greatest frequency of choice in all groups, however, was of individuals of the same economic status.

5. In all three friendship groups, the students tended to choose friends of their own social status.

6. With the exception of graduate students, few of whom were surveyed, the students showed a tendency to choose friends of their own class rank.

Miss Virginia Ann McCoy of Newton, N. J., former Bowling Green State University student, has become a flight stewardess with Delta Air Lines at Atlantic, Ga. She recently graduated from Delta's stewardess school at Atlanta airport. While a student at Bowling Green, Miss McCoy was a member of Sigma Delta Pi, honorary Spanish fraternity; Omega Phi Alpha, service sorority, and the university choir.

DR. PLATT AT OSU

Dr. Grover C. Platt, professor and chairman of the department of history, is teaching at Ohio State University during the summer. He is teaching course work on modern Germany.

Dean Shuck Writes Article For College Placement Journal

An article by Dr. Emerson C. Shuck, dean of the college of liberal arts at Bowling Green State University, appears in the current issue of the Journal of College Placement, published in Philadelphia.

Basing his article on a two-year survey, Dr. Shuck gives new insight to the problem of just how employable the liberal arts graduate is, compared with the technical graduate.

"A liberal arts graduate, regardless of his subject major in college, can find many kinds of employment," writes Dean Shuck, "and what is even more important, he can make a better and more satisfying job for himself in the future. He may have to exert more initiative at first than if he were trained for some specific job. He may also receive a lower beginning salary than his more vocationally trained counterpart. But actual records show that on the average within ten years he probably will have passed his technical friend in both position and salary, all other things being equal."

Nine Named To Faculty For Next University Term

The appointment of nine men to the Bowling Green State University faculty for the 1957-58 term has been announced by Dr. Ralph W. McDonald, president.

They are Dr. Morgan Brent, Philadelphia, Pa., assistant professor of biology; Dr. N. William Easterly, Morgantown, W. Va., instructor in biology; Dr. Edward J. Karlin, Farmingdale, N.Y., instructor in biology; Dr. Frank Balanza, Jr., Baton Rouge, La., instructor in English; Dr. Richard D. Hoare, Columbia, Mo., instructor in geology; Ernest J. Burgi, Pittsburgh, Pa., assistant professor of speech; Merle Flamm, Clyde, O., instructor in physics; Carl D. Hall, Iowa City, Ia., instructor in art, and Dr. Robert L. Chapman, Iowa City, Ia., instructor in music.
